

# Commercial Plan of Recovery and Resilience Srls

PCRR JWTeam Srls - Registered Office: Via Terrazzano 85 - 20017 Rho (MI) - CF and PI 12092979066, Share Capital € 200, Pec: pccrjw@pec.it  
document , Place Milan, date 21-03-2022  
Jurisdiction: Milan (Italy)

**J W T**  
**joules water team**  
<https://www.jwt-jwt.it/>

Brief description of the objectives of the individual companies in [JWTeam](#) (more details in the respective Business Plans, already on the front page with **CapEx, OpEx, Built and VAN** ); [JWTeam](#) , with each company, opens to investors (by negotiating shareholdings <15%, FIFO), both against share capital **and** with sales of innovative **supplies** (see **StartKit** , for equal volumes of EBITDA) and therefore at substantial " **ZERO cost** " for counterparties;

- 1) [Budget 2.0 M € , 55 M € VAN \(8%, 20y\)](#) , [iteg-jwt.it](#) : industrial plan for the development and production of **rotor systems** to act with fluids (aeriforms and liquids), for propulsive functions (cardiology, pharmaceuticals, chemical, nautical, aeronautical industries , oil & gas, ...) or interceptive (hydroelectric, wind, marine, ...); ... Higher efficiencies and energy yields, with lower costs and volumes;
- 2) [Budget 1.0 M € , 38 M € VAN \(8%, 20y\)](#) , [mbgc-jwt.it](#) : industrial plan for the development and production of **systems for anaerobic digestion** , "small and well done" to be inserted in a "distributed and pervasive" way in urban and peri-urban areas ( condominiums, hotels, rsa, ... micro agro-zootechnical companies), and wherever useful the reclamation of organic results from anthropic (and related) activities, with their energy and environmental enhancements;
- 3) [Budget 2.0 M € , 44 M € NPV \(8%, 20y\)](#) , [pbrc-jwt.it](#) : industrial plan for the development and production of **systems for microalgae cultivation** , to contrast carbon dioxide (CO2), produce oleic (biofuels) and protein (for nutraceuticals, drugs, cosmetics, chemistry, ...); contribute to the fight against heavy metals and the reclamation of compromised water bodies;
- 4) [Budget 1.0 M € , 19 M € NPV \(8%, 20y\)](#) , [sldr-jwt.it](#) : implement and design interventions to **expand crop windows** (conditioning with heat, cold, better hygroscopic and breathing levels for the roots), using only renewable sources ; This is followed by more savings (80%) in fertilizers, pesticides (water tables are preserved), management of weather peaks, water reserves, contrasting desertification of large territories, natural grass surfaces (for recreational and sporting activities, football, rugby, tennis, ...); better road safety, contrast to hydrogeological instability and usability of logistic and airport structures;
- 5) [Budget 1.0 M € , 30 M € NPV \(8%, 20y\)](#) , [sdgc-jwt.it](#) : industrial plan for the development and production of **desalination systems**, using only renewable sources (ZERO use of fossils, neither direct nor indirect); useful for producing fresh water (essential for human, agronomic and industrial purposes) from marine, brackish and water bodies compromised by anthropogenic activities; strategic for each plant engineering industry and in particular for the advent of the hydrogen industry;
- 6) [Budget 1.0 M € , 37 M € VAN \(8%, 20y\)](#) , [gsmf-jwt.it](#) : industrial plan for the development and production of **systems for gravimetric separation** of fluids (gaseous or liquid), strategic in purification processes, where separation remains a preliminary act in any intervention circular economy; very useful for combating carbon pollution (Carbon Capture), in urban and rural areas;
- 7) [Budget 1.0 M € , 83 M € NPV \(8%, 20y\)](#) , [pcrr-jwt.it](#) : " **Commercial Plan for Recovery and Resilience** " proactive to the **Ecological Transition of PNRR** ; promotes highly digital dissemination and implementation actions on circular economy interventions and their high automation (Transition 4.0); with recourse to a vast plan of digital communications and " **voluntary telematic auctions** " aimed at conveying " **Made in Italy** " intangible assets ; important digital technologies are used and developed in support of a lot of legal information technology (PEC, digital signatures, hashing, blockchain, ...), increasingly strategic in the enhancement of intangible assets in economic and social activities;

\*\*\* **NB all of them have rights on further contiguous patents and know-how**

\*\* last entry

[Budget 2.0 M € , 58 M € NPV \(8%, 20y\)](#) , [gfss-jwt.it](#) : industrial plan for the development and production of **systems for the separation** of mixtures (including solutions), gaseous or liquid, with systemic actions on components with different gravitational density indices, electric and magnetic; innovative strategies in remediation processes, where separation with high resolution remains strategic for the circular economy and also towards genomic research;

[JWTeam](#) was also created to strategically support redevelopment plans for previous real estate assets (the previous one is more required to pursue energy independence, ... the new one " **has to do well** "); it follows the heartfelt invitation to architects and professionals to consider the following project, for independence with sustained use of renewable sources, aiming at efficiency on primary resources (see water, energy), respect the environment and with more inclusiveness:

"[@GUPC Lab](#)", 60 Centers of Excellence with **GREEN** innovation , supported by [DL Budget 2020](#) , [DL Relaunch](#) and with [MISE - Transition 4.0](#) (eg [INDUSTRY 4.0 -> TRANSITION 4.0](#) ); many conveniences to companies, and in particular those involved in [Construction 4.0](#) , [Condominium 4.0](#) ( [CLI](#) , [CNS](#) , [IMP](#) , [Show](#) ), ... **well over 110 and ... INNOVATING with TCC** .

Objective: to **intercept a solid partnership** with a sober Real Estate Operator who has access to a credit line for € 300 million (restored in 2/3 years, rewarded by a margin of 30%, financial reimbursements of 10%, as well as significant benefits from **Transition 4.0 / PNRR** to the companies involved, for about 30/40%), oriented to lead and preside over an induced future for hundreds of billions of euros (in the following decades).

**... As well as well-being to the planet and communities !!!**
